

okmsystem[®]

The advanced system of
therapeutic immobilisation

okm[®]

EXPERTS IN IMMOBILISATION

Okm began in 2000 and is the result of the collaboration between experts in orthopaedic technology, Bioiberica (leaders in chondroprotection) and Synthesia Española (firm of reference within the field of polyurethane) with the intention of developing new products and technology in the field of immobilisation.

Commitment

Innovation

The result of this collaboration is OKMSYSTEM. Today our system has been exported around the world.

Our aim is to offer products of maximum quality, adapted to the needs of medical professionals and which improve the quality of life of their patients. True to this acquired commitment, OKM dedicates an important part of its resources to innovation.

Quality of life

okmsystem[®]

Innovative immobilisation solutions for a better functional recuperation.

**Immobilisation system for trauma and
post-operative pathologies.**

efficient

hygienic

comfortable

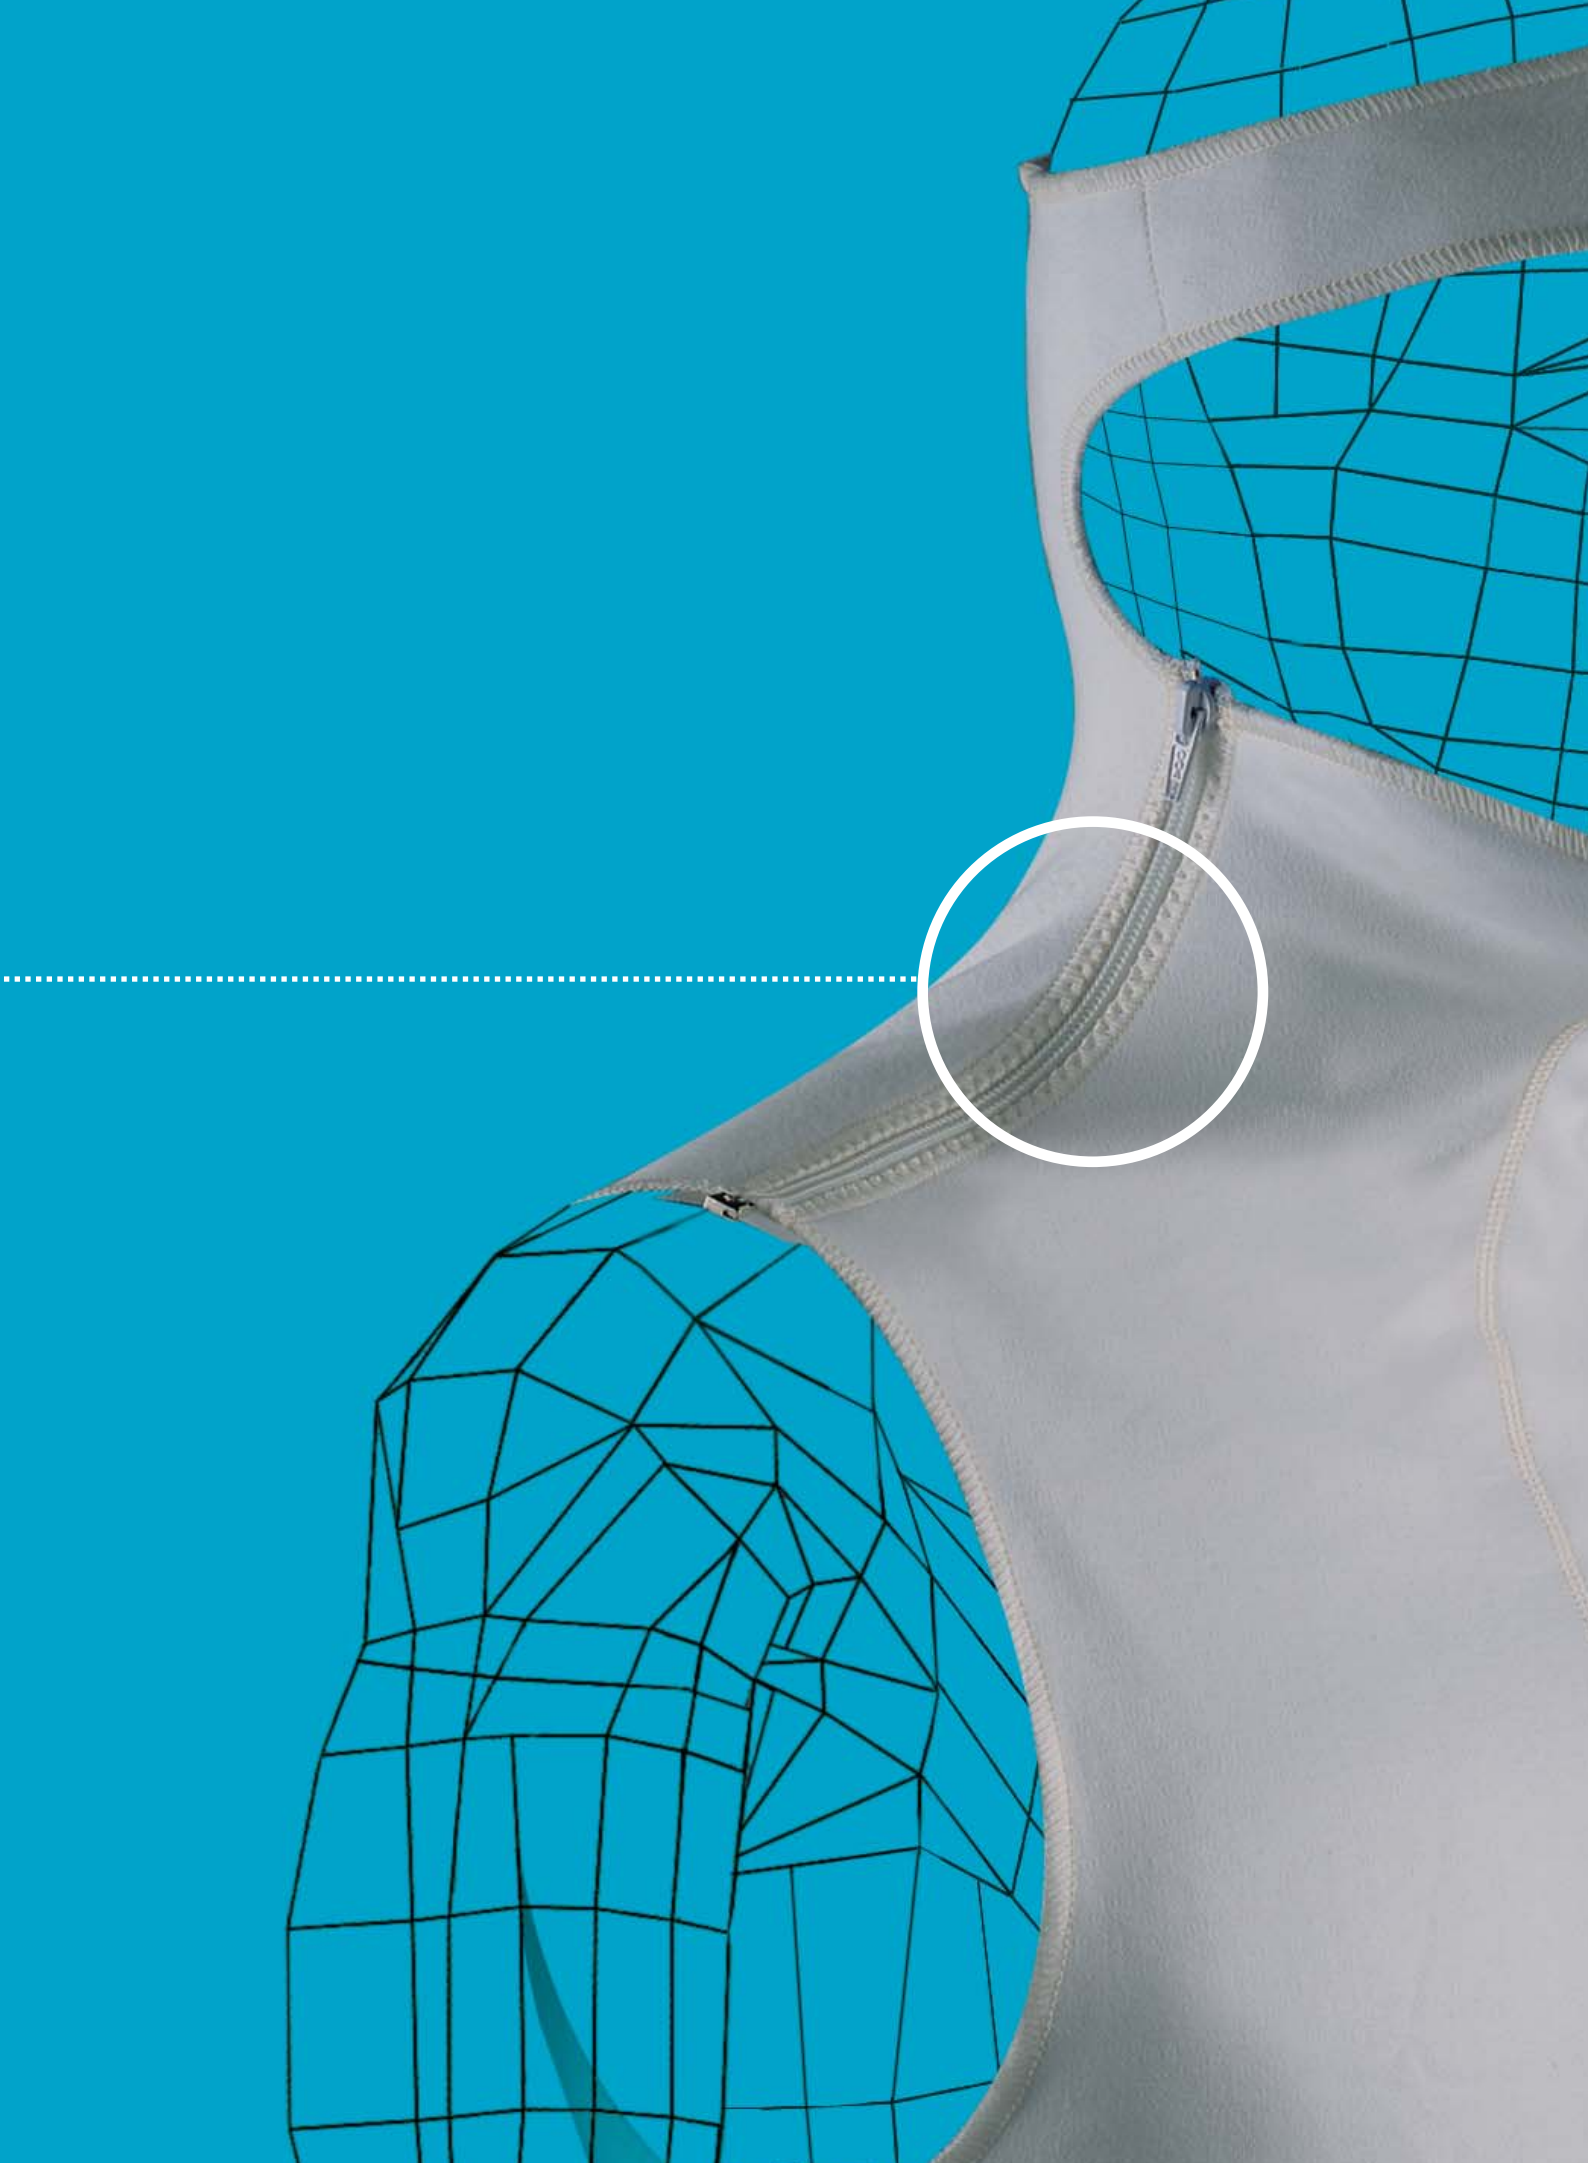

efficient

okmsystem
